Gender Split per Quartile

Commentary

In comparing the 2019 and 2020 mean gender pay gap figure for the College this shows an increase from 12.0% to 15.30%. Fluctuations in the gender profile of the four quartiles reflect staffing movements which would impact on the mean gender pay gap figure, suggesting that this is likely to reflect normal staff fluctuations.

Whilst this does show a move, when comparing to the national overall mean benchmark of 15.5%, Brockenhurst College does not have a significant gender pay gap. We conclude that the College's employee recruitment, retention and progression policies and practices are operating largely effectively.

It is recognised that a higher proportion of our part-time positions are held by female employees. Females are also comparatively under-represented in technical roles such as IT Support services. The College is committed to being a fair and inclusive organisation and to reducing its gender pay gap. We will continue to review and seek to improve further by reflecting our positive commitment on our careers website, in our recruitment practices and through employee engagement policies and frameworks as these are updated.
